Reply to snapshot options??

*Subject:
RE: snapshot options??

*Message:
Tried the print screen button? "Pmt Scrm". Then you open word, pain or some other program and choose paste. If you press ctrl or was it alt, at the same time as you press print screen, you will only get the active window.

Author	Thread: snapshot options??
ICON	Posted Monday Jul 10th, 2006 - 6:40 AM Do you know if there is a way to take a "snapshot" of a screen image. If so, does it maintain the integrity of the scale that the image was drawn at?
